Project Overview

The Village of Mamaroneck is developing a Comprehensive Safety Action Plan (CSAP) to improve roadway safety for all travelers. Funded through the federal Safe Streets and Roads for All (SS4A) program, this data-driven plan is to reduce and ultimately eliminate traffic-related deaths and serious injuries across the village.

Preliminary "Safe Roads" Improvements Recommendations:

- Intersection and crosswalk improvements to enhance pedestrian and bicyclist safety.
- Traffic calming measures to reduce vehicle speeds.
- Improved signage and visibility at key locations.
- Educational programs and safety awareness campaigns for drivers, pedestrians, and bicyclists.
- Targeted safety improvements along high-crash corridors and priority locations.

Timeline: The Action Plan will be posted online and will be publicly available – anticipated in Spring 2027.

Get Involved: Please share your ideas about what steps Mamaroneck can take towards implementing the safe system approach.

What is Safe Streets For All (SS4A)?

SS4A is a federal grant program created under the Bipartisan Infrastructure Law that provides $5 billion over five years (2022–2026) to help communities reduce roadway fatalities and serious injuries.

The Safe System Approach

The Village of Mamaroneck is committed to eliminating all traffic deaths and serious injuries. Guided by the Safe System Approach, this vision recognizes deaths and serious injuries on our roads are unacceptable, so safety must be proactively addressed by a transportation system that accepts human mistakes, recognizes human vulnerability, relies on shared responsibility, and builds in layers of redundancy to protect everyone even if one part of the system fails.

The five elements of the safe system approach are:

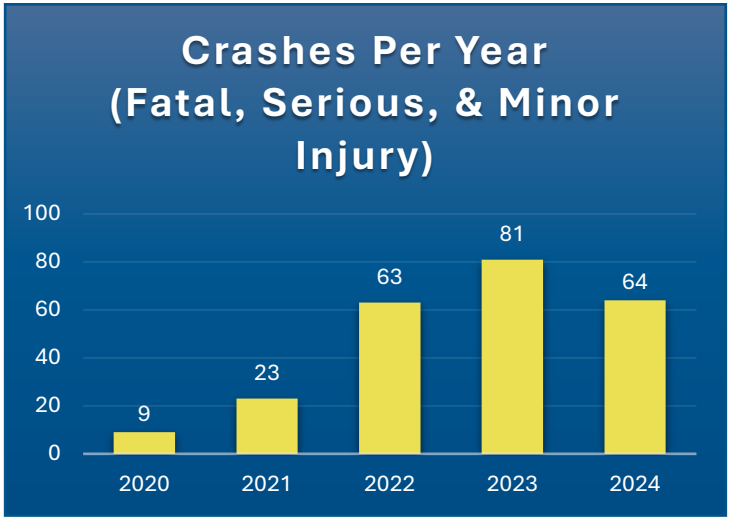

- Safe road users
- Safe vehicles
- Safe speeds
- Safe roads
- Post-crash care

Village of Mamaroneck Crashes

A five-year period from 2020 through 2024 was analyzed to meet SS4A requirements. During this period, the Village of Mamaroneck experienced 240 injury crashes:

- 2 Fatal Crashes
- 35 Serious Injury Crashes
- 203 Minor Injury Crashes

Note: These data include crashes that occurred on Interstate 95
